

IDBI Bank Ltd.

Consolidated Pillar III Disclosures (March 31, 2026)

1. Scope of Application and Capital Adequacy

Table DF-1: Scope of Application

Accounting and regulatory consolidation

For the purpose of financial reporting, the Bank consolidates its subsidiaries in accordance with Accounting Standard (AS) 21, Consolidated Financial Statements, on a line-by-line basis by adding together like items of assets, liabilities, income and expenditure. Investments in associates are accounted for by the equity method in accordance with AS-23, “Accounting for Investments in Associates in Consolidated Financial Statements”.

For the purpose of consolidated prudential regulatory reporting, the consolidated Bank includes all group entities under its control, except group companies which are engaged in insurance business and any non-financial activities. Details of subsidiaries and associates of the Bank along with the consolidation status for accounting and regulatory purposes are given below:

Name of the head of the banking group to which the framework applies: IDBI Bank Ltd.

(i) Qualitative Disclosures

a. List of group entities considered for consolidation

Name of the entity / Country of incorporation	Whether the entity is included under accounting scope of consolidation (yes/no)	Explain the method of consolidation	Whether the entity is included under regulatory scope of consolidation (yes/no)	Explain the method of consolidation	Explain the reasons for difference in the method of consolidation	Explain the reasons if consolidated under only one of the scopes of consolidation
IDBI Capital Market & Securities Ltd	Yes	Consolidated in accordance with AS-21, Consolidated Financial Statements	Yes	Consolidated in accordance with AS-21, Consolidated Financial Statements	NA	NA

Name of the entity / Country of incorporation	Whether the entity is included under accounting scope of consolidation (yes/no)	Explain the method of consolidation	Whether the entity is included under regulatory scope of consolidation (yes/no)	Explain the method of consolidation	Explain the reasons for difference in the method of consolidation	Explain the reasons if consolidated under only one of the scopes of consolidation
IDBI Asset Management Ltd/India	Yes	Consolidated in accordance with AS-21, Consolidated Financial Statements	Yes	Consolidated in accordance with AS-21, Consolidated Financial Statements	NA	NA
IDBI MF Trustee Company Ltd/India	Yes	Consolidated in accordance with AS-21, Consolidated Financial Statements	No	NA	NA	IDBI MF Trustee Company Ltd is a non-Financial Entity. Deducted from Consolidated Regulatory Capital of the group.
IDBI Intech Ltd/India	Yes	Consolidated in accordance with AS-21, Consolidated Financial Statements	No	NA	NA	IDBI Intech Ltd is a non-Financial Entity. Deducted from Consolidated Regulatory Capital of the group.

Name of the entity / Country of incorporation	Whether the entity is included under accounting scope of consolidation (yes/no)	Explain the method of consolidation	Whether the entity is included under regulatory scope of consolidation (yes/no)	Explain the method of consolidation	Explain the reasons for difference in the method of consolidation	Explain the reasons if consolidated under only one of the scopes of consolidation
IDBI Trusteeship Services Ltd/India	Yes	Consolidated in accordance with AS-21, Consolidated Financial Statements	No	NA	NA	IDBI Trusteeship is a non-Financial Entity. Deducted from Consolidated Regulatory Capital of the group.
Biotech Consortium India Limited	Yes	Accounted for by the equity method in accordance with AS-23, "Accounting for Investments in Associates in Consolidated Financial Statements".	No	NA	NA	Risk weighted for capital adequacy purposes

Name of the entity / Country of incorporation	Whether the entity is included under accounting scope of consolidation (yes/no)	Explain the method of consolidation	Whether the entity is included under regulatory scope of consolidation (yes/no)	Explain the method of consolidation	Explain the reasons for difference in the method of consolidation	Explain the reasons if consolidated under only one of the scopes of consolidation
North Eastern Development Finance Corporation Limited	Yes	Accounted for by the equity method in accordance with AS-23, "Accounting for Investments in Associates in Consolidated Financial Statements".	No	NA	NA	Risk weighted for capital adequacy purposes

* NA – Not Applicable

b. List of group entities not considered for consolidation both under the accounting and regulatory scope of consolidation

There are no group entities that are not considered for consolidation under both the accounting scope of consolidation and regulatory scope of consolidation.

(ii) Quantitative Disclosures:

c. List of group entities considered for regulatory consolidation:

(Amt in ₹ Crore)

Name of the entity / country of incorporation (as indicated in (i) a. above)	Principle activity of the entity	Total balance sheet equity (as stated in the accounting balance sheet of the legal entity)	Total balance sheet assets (as stated in the accounting balance sheet of the legal entity)
IDBI Capital Market & Securities Ltd	Business includes stock broking, distribution of financial products, merchant banking, corporate advisory services, etc.	Rs.128.10	Rs.520.28
IDBI Asset Management Ltd/India	Manages investments of funds raised through MF schemes.	Rs.200.00	Rs.227.55

d. The aggregate amount of capital deficiencies in all subsidiaries which are not included in the regulatory scope of consolidation i.e. that are deducted:

There is no capital deficiency in any subsidiary, which is not included in the regulatory scope of consolidation.

e. The aggregate amounts (e.g. current book value) of the bank's total interests in insurance entities, which are risk-weighted:

There is nil aggregate amount of the bank's total interests in insurance entities.

f. Any restrictions or impediments on transfer of funds or regulatory capital within the banking group:

There are no restrictions or impediments on transfer of funds or regulatory capital within the banking group.

Table DF-2: Capital Adequacy

The Bank maintains and manages capital as a cushion against the risk of probable losses and to protect its stakeholders, depositors and creditors. The future capital requirement of the Bank is projected as a part of its annual business plan, in accordance with its business strategy. To calculate the future capital requirements of the Bank a view on the market behaviour is taken after considering various factors such as interest rate, exchange rate and liquidity positions. In addition, broad parameters like balance sheet composition, portfolio mix, growth rate and relevant discounting are also considered.

Further, the loan composition and rating matrix is factored-in to reflect precision in projections. In line with Basel III guidelines, which are effective since April 01, 2013, the Bank has been calculating its capital ratios as per the extant RBI guidelines. The main focus of Basel III norms is on the quality and quantity of Tier I capital. The Standalone CRAR position of the Bank as on March 31, 2026 is as given below:

Capital Adequacy Ratios	
CET 1	25.55%
Tier 1	25.55%
Tier 2	1.10%
CRAR	26.65%

Risk exposure & Assessment

For identification, quantification and estimation of current and future risks which are not captured at all or not fully captured under the Standardised Approach of Pillar-I , the Bank has a Board approved Internal Capital Adequacy Assessment Process (ICAAP) Policy. This policy covers the process for addressing such risks, measuring their impact on the financial position of the Bank and formulating appropriate strategies for their containment & mitigation, thereby maintaining an adequate level of capital. ICAAP exercise is conducted periodically to determine that the Bank has adequate capital to meet regulatory requirements in line with its business requirements. ICAAP Policy of the Bank also lays down the roadmap for comprehensive stress testing, covering regulatory stress conditions to give an insight into the impact of severe but plausible stress scenarios on the Bank's risk profile and capital position. The stress tests exercises are carried out quarterly incorporating RBI guidelines on Stress Testing stipulated in Master Directions dated November 28, 2025. The impact of stress scenarios on the profitability and capital adequacy of the Bank are analysed. Stress testing framework includes scenario analysis to understand the impact of further increase in Gross NPA, crystallization of NFB facilities of NPA and Technically Written Off accounts and illiquid securities on capital and profitability of the Bank. The mechanism of reverse stress testing is used to find the level of stress which may adversely impact the capital to take it to a pre-determined floor level. The result of the exercise is reported to the suitable Board level committee(s).

The Consolidated CRAR position, as on March 31, 2026 is as under:

(Amt. in ₹ Crore)

Capital requirement	
Credit Risk Capital:	
Portfolios subject to standardised approach	21,276.28
Securitisation	132.89
Market Risk Capital:	
Standardised duration approach	534.63
<i>Interest Rate Risk</i>	308.72
<i>Foreign exchange Risk (including Gold)</i>	39.60
<i>Equity Risk</i>	186.31
<i>On derivatives (FX Options)</i>	0.00
Operational Risk Capital:	
Basic indicator approach	2,500.73
Common Equity Tier 1, Tier 1 and Total capital ratio:	
CET 1	25.71%
Tier 1	25.71%
Tier 2	1.09%
Total(Tier 1 + Tier 2)	26.80%

DF-3a: Credit Risk - General Disclosures:

Credit risk is the risk of loss that may occur due to default of the counterparty or from its failure to meet its obligations as per terms of the financial contract. Any such event will have an adverse effect on the financial performance of the Bank. The Bank faces credit risk through its lending, investment and contractual arrangements. A robust risk governance framework has been put in place to counter the effect of credit risk faced by the Bank. The framework provides a clear definition of roles as well as allocation of responsibilities with regard to ownership and management of risks. Allocation of responsibilities is further substantiated by defining clear hierarchy with respect to reporting relationships and Management Information System (MIS) mechanism.

Bank's Credit risk management policies

The Bank has defined and implemented various risk management policies, procedures and standards with an objective to clearly articulate processes and procedural requirements that are binding on all concerned Business groups. Credit Policy of the Bank is guided by the objective to build, sustain and maintain a high quality credit portfolio. The policy document lays down broad approaches and guidance for lending to different business segment, besides guidance on credit process, credit risk management, control and monitoring with emphasis on maintaining asset quality as well as risk adjusted return. The policy also addresses more granular factors such as

diversification of the portfolio across counter parties, business groups, industries, geographies and sectors. The policy reflects the Bank's approach towards lending to corporate clients in light of prevailing business environment and regulatory stipulations.

Bank's Credit Policy also details the standards for its Retail Assets portfolio. The policy also guides the formulation of individual product program guidelines for various retail products. Credit Policy is reviewed annually in anticipation of or in response to the dynamics of the environment (regulatory & market) in which the Bank operates or to change in strategic direction, risk tolerance, etc. The policy is approved by the Board of Directors of the Bank.

Bank has put in place internal guidelines on exposure norms in respect of single borrower, groups, exposure to sensitive sector, industry exposure, unsecured exposures, etc. to control concentration of credit risk. Norms have also been detailed for soliciting new business as well as for preliminary scrutiny of new clients. Bank abides by the directives issued by RBI, SEBI and other regulatory bodies in respect of lending to any industry including NBFCs, Real Estate, Capital Markets, Commodities, Gems and Jewellery and Infrastructure. In addition, internal limits have been prescribed for certain specific segments based on prudential considerations.

The Bank has a specific policy on Counter Party Credit Risk pertaining to exposure on domestic & international banks and a policy on Country Risk Management pertaining to exposure on various countries. In line with regulatory guidelines, the Bank also computes exposure under Large Exposure Framework (LEF) following the net accounting method.

Credit risk assessment process:

The sanction of credit proposals is in accordance with the delegation structure approved by the Board of Directors. Credit risk rating, used by the Bank is one of the key tools for assessing its credit proposals. The Bank uses ICON, a web based rating platform for credit risk rating. ICON currently hosts nine Credit Risk Assessment Models. Different risk parameters such as financial, business, management and industry are used for different rating models in accordance with the category and characteristics of the borrower. Qualitative and quantitative information of the proposal is evaluated by the credit risk analyst to ascertain the credit rating of the borrower. Credit rating process is a multilevel approach based on maker and checker concept. Based on size/ kind of the exposure and sanctioning authority, credit proposals are rated at stipulated levels. Approval of credit for retail products are guided by the individual retail product paper guidelines and each proposal is appraised through a scoring model. In addition to the above, a Credit audit process is in place, which aims at reviewing the loans and acts as an effective tool to evaluate the efficacy of credit assessment, monitoring and mitigation process.

Credit portfolio monitoring:

The credit portfolio of the Bank is monitored on regular basis to ensure compliance with internal and regulatory limits as well as to avoid undue concentration (borrower or Industry). The same is periodically reported to the senior management. Further, to ensure high quality of the asset portfolio the Bank has adopted a two pronged strategy i.e., containment of incidence of asset slippages and resolution / recovery from NPAs.

In this regard, Bank has a Credit Monitoring Policy which is an integral part of the Credit Policy of the Bank and is applicable to all the standard loan accounts of the Bank across business verticals and branches. The policy sets up guidelines for a timely and effective and structured assessment, analysis, review, monitoring and control of credit risk with primary objective of improving the credit quality of the Bank's loan portfolio. The policy is implemented by Credit Monitoring Group (CMG) set up at the Corporate Office of the Bank. There are three pillars of credit monitoring to be deployed by CMG

- Monitoring of Onset of Stress/ special mention accounts
- SMA Monitoring and control
- Early Warning Signals (EWS) in loan accounts

Further, the Bank has an NPA Management Policy, which sets out guidelines for restricting slippage of existing standard assets and recovery / resolution of NPA by close monitoring, constant follow-up and evolving a suitable proactive Corrective Action Plan.

Definitions of non-performing assets:

The Bank classifies its advances into performing and non-performing advances in accordance with the extant RBI guidelines. The non-performing asset (NPA) is a loan or an advance where i. Interest and/ or instalment of principal remains overdue for a period of more than 90 days in respect of a term loan and the account remains 'out of order' in respect of an Overdraft/Cash Credit (OD/CC). An account should be treated as 'out of order' if the outstanding balance remains continuously in excess of the sanctioned limit/drawing power for 90 days. In cases where the outstanding balance in the principal operating account is less than the sanctioned limit/drawing power, but there are no credits continuously for 90 days as on the date of Balance Sheet or credits are not enough to cover the interest debited during the same period, these accounts should be treated as 'out of order'. Other NPAs are as under:

- The bill remains overdue for a period of more than 90 days in the case of bills purchased and discounted,

- The instalment of principal or interest thereon remains overdue for two crop seasons for short duration crops
- The instalment of principal or interest thereon remains overdue for one crop season for long duration crops,
- The amount of liquidity facility remains outstanding for more than 90 days, in respect of a securitisation transaction undertaken in terms of the Reserve Bank of India (Securitisation of Standard Assets) Directions, 2021.
- In respect of derivative transactions, the overdue receivables representing positive mark-to-market value of a derivative contract, if these remain unpaid for a period of 90 days from the specified due date for payment.
- In case of interest payments, banks should, classify an account as NPA only if the interest due and charged during any quarter is not serviced fully within 90 days from the end of the quarter

NPAs are further classified into sub-standard, doubtful and loss assets. A substandard asset is one, which has remained as NPA for a period less than or equal to 12 months. An asset is classified as doubtful if it has remained in the sub-standard category for a period of 12 months. A loss asset is one where loss has been identified by the bank or internal or external auditors or the RBI inspection but the amount has not been written off wholly.

In respect of investments in securities, where interest / principal is in arrears, the Bank does not reckon income on such securities and makes provisions as per provisioning norms prescribed by RBI for depreciation in the value of investment.

b. & c. Total gross credit risk exposures & Geographic distribution of exposures: Fund and Non-fund based

(Amt. in ₹ Crore)

Particulars	Fund Based	Non Fund Based	Total
Domestic	3,52,926.75	1,04,703.51	4,57,630.27
Overseas	16,242.55	0.00	16,242.55
Total Gross Exposures	3,69,169.30	1,04,703.51	4,73,872.81

d. Industry type distribution of Gross credit exposures: Fund and Non-Fund based

(Amt.in ₹ Crore)

Industry	Fund Based	Non Fund Based	Total
Agriculture & Allied Activities	35,175.77	78.53	35,254.30

Total	56,837.77	1,28,011.25	2,53,626.07	28,084.58	4,66,559.67

f. g & h. Amount of NPAs (Gross) & Net NPAs & NPA Ratios

(Amt. in ₹ Crore)

Particulars	Amount
Gross Advances	2,59,274.30
Net Advances	2,53,626.07
Gross NPA as on March 31, 2026	
<i>a. Substandard</i>	685.22
<i>b. Doubtful 1</i>	398.51
<i>c. Doubtful 2</i>	628.88
<i>d. Doubtful 3</i>	570.48
<i>e. Loss</i>	3,745.03
Total	6,028.12
NPA Provision*	5,648.22
Net NPA	379.90
NPA Ratios	
Gross NPAs to Gross Advances (%)	2.32%
Net NPAs to Net Advances (%)	0.15%

*Including NPV Loss on NPA, ICA Provision and NCLT Provision.

i. Movement of Non-Performing Assets (NPA):

(Amt. in ₹ Crore)

Particulars (NPA Gross)	As on March 31, 2026
Opening Balance as on January 01, 2026	6,280.94
Additions	320.18
Write Offs	113.05
Reductions	459.94
Closing Balance	6,028.12

j. a) Movement of Specific NPA Provisions:

(Amt. in ₹ Crore)

Particulars	As on March 31, 2026
	Specific Provisions*
Opening Balance as on January 01, 2026	5,855.65
Add : Provision made during the period	283.54
Less : Transfer to Counter-Cyclical Provisional Buffer	0.00
Less : Write offs	113.05
Less : Write Back of excess provision	377.92
Closing Balance	5,648.22

*Including NPV Loss on NPA, ICA Provision and NCLT Provision.

b) Movement of General Provisions:

(Amt. in ₹ Crore)

Particulars	As March 31, 2026
	General Provisions
Opening Balance as on January 01, 2026	2,340.86
Add : Provision made during the period	105.33
Less : Transfer to Counter-Cyclical Provisional Buffer	0.00
Less : Write offs	0.00
Less : Write Back of excess provision	
Closing Balance	2,446.19

Write-offs and recoveries that have been booked directly to the income statement is ₹ 1394.72 Crore for March 31, 2026 quarter.

k & l. Position of Non-Performing Investments (NPI) as on March 31, 2026

(Amt. in ₹ Crore)

Particulars	As on March 31, 2026
Amount of Non-performing Investments (NPI)	1,974.93
Amount of provisions held for Non-performing Investments	1,974.93

m. Movement of provisions for depreciation on investments (Q2Q)

(Amt. in ₹ Crore)

Particulars	As on March 31, 2026
Opening Balance as on January 01, 2026	5,008.84
Provisions made during the period	107.50
Write offs / Write Back of excess provisions	153.15
Closing Balance	4,963.19

n. By major industry wise NPA, Specific Provisions & Write-Offs *

(Amt. in ₹ Crore)

Particulars	As of March 31, 2026		During the current Period	
	Gross NPA	Specific Provision (NPA)	Specific Provision (NPA)	Write-Offs
NPAs and Specific Provisions in Top 5 Industries	3,935.47	3,686.44	355.67	730.44

*Industries identified based on Gross Credit Exposure to Industries.

General NPA Provision is Nil

o. a) Geography based position of NPA & Specific Provision break-up

(Amt. in ₹ Crore)

Particulars	As of March 31, 2026		
	Domestic	Overseas	Total
Gross NPA	6,001.14	26.99	6,028.12
Specific Provision for NPA	5,621.24	26.99	5,648.23

b) Geography based position General Provision break-up:

(Amt. in ₹ Crore)

Particulars	As of March 31, 2026		
	Domestic	Overseas	Total
General Provision	2,446.19	0.00	2,446.19

Table DF-4: Credit Risk: Disclosures for Portfolios Subject to the Standardised approach

The Bank uses the solicited ratings assigned by the external credit rating agencies specified by RBI for calculating risk weights on its exposures for capital calculations. In line with the Basel guidelines, banks are required to use the external ratings assigned by domestic credit rating agencies viz. CRISIL, CARE, ICRA, India Ratings, ACUTIE, INFOMERICS, BRICKWORK and international credit rating agencies Fitch, Moody's and Standard & Poor's. The ratings assigned, are used for all eligible on balance sheet & off balance sheet exposure. Only those ratings which are publicly available and are in force as per the monthly bulletin of the rating agencies are considered.

The entire amount of credit risk exposure to the Bank is taken into account for external credit assessment, to be eligible for risk weighting purposes. The Bank uses short term ratings for exposures with contractual maturity of less than or equal to one year and long term ratings for those exposures which have a contractual maturity of over one year.

The process used to assign the ratings to a corporate exposure and apply the appropriate risk weight is as per the regulatory guidelines prescribed by RBI. In cases where there are two ratings, attracting different risk weights, the higher risk weight are applied. In case of three or more ratings, the rating with second lowest risk weight is applied. The table given below gives the breakup of net outstanding amounts of assets in Banking Book and Non-Fund Based Facilities after Credit Risk Mitigation in 3 major risk buckets as well as those that are deducted:

(Amt. in ₹ Crore)

Risk Weight	Net Exposure
Less than 100%	3,93,069.11
At 100%	35,948.59
More than 100%	41,803.20
Deduction from Capital	46.10
Total	4,70,867.00

Table DF-5: Credit Risk Mitigation: Disclosures for Standardised Approaches:

Collateral is an asset or a right provided by the borrower to the lender to secure a credit facility. Bank obtains collaterals against its exposures to mitigate credit risk. The Bank has a Board approved Credit policy which covers Collateral Management and Credit Risk Mitigation (CRM) Techniques. These include norms on acceptable collaterals, procedures & processes to enable classification and valuation of such collaterals. On-Balance sheet netting is confined to loans and deposits, where the Bank has legally enforceable netting arrangements, involving specific lien in addition to other stipulated conditions. The netting is only undertaken for loans against collaterals of the same counterparty and subject to identifiable netting arrangement. Both financial as well as non-financial collaterals are used to hedge its credit exposures. Appropriate collateral for a product is determined after taking into account the type of borrower, the risk profile and the facility. The main types of eligible financial collaterals accepted by the Bank are Cash, Bank's own deposits, Gold, National Savings Certificates, Kisan Vikas Patra, Insurance policies with a declared surrender value and various Debt securities. The non-financial collaterals include Land & Building, Plant & Machinery, Stock, etc. However, under the retail portfolio the collaterals are defined as per the type of product e.g. collateral for housing loan would be residential mortgage and an automobile is a collateral for auto loan. Most of the eligible financial collaterals, where the Bank has availed capital benefits under CRM techniques, are in the form of Bank's own FDs which are not subject to credit or market risk.

The Bank also considers guarantees for securing its exposures; however only those guarantees which are direct, explicit and unconditional are considered. Sovereigns, Public Sector Entities, Banks, Primary Dealers, and Credit Guarantee fund Trust for Micro and Small Enterprises (CGTMSE), Export Credit Guarantee Corporation (ECGC), National Credit Guarantee Trustee Company (NCGTC) managed guarantees and highly rated corporate entities are considered as eligible guarantors by the Bank for availing capital benefits as stipulated in the Basel guidelines. The Bank utilizes various processes and techniques to reduce the impact of the credit risk to which it is exposed. CRM is one such tool designed to reduce the Bank's credit exposure to the counterparty while calculating its capital requirement to the extent of the value of eligible financial collateral. The credit exposure to a counter party is adjusted by the value of eligible financial collaterals after applying appropriate haircuts. The haircuts are applied to account for volatility in value, including those arising from currency mismatch for both the exposure and the collateral. For availing capital savings under eligible guarantees, the amount of exposure is divided into covered and uncovered portions. The covered portion of the exposure attracts the risk weight of guarantor, while the uncovered portion continues to attract the risk weight of the obligor subject to meeting requirements stipulated in the Basel guidelines.

The Bank's exposures where CRM techniques were applied are as follows:

(Amt. in ₹ Crore)

Particulars	Fund Based	Non-Fund Based
Total Exposures covered by eligible financial collateral	29,268.56	14,769.18
Exposure after taking benefit of eligible collateral	3,769.94	7,687.62

The exposure covered by guarantees where CRM techniques as per RBI guidelines were applied amounted to ₹ 21,465 Crore as on March 31, 2026.

Table DF-6: Securitization exposure-Disclosure for Standardized Approach:

Qualitative Disclosures										
a. The general qualitative disclosures with respect to securitization activities of the Bank are as follows:										
<ul style="list-style-type: none"> •The Bank's objectives in relation to securitization activity, including the extent to which these activities transfer credit risk of the underlying securitized exposures away from the bank to other entities. • The nature of other risks inherent in securitized assets. • The various roles played by the Bank in the securitization process and an indication of the extent of the bank's involvement in each of them; 	<p>Bank has not securitized-out any standard loans during year ended as on March 31, 2026. Hence, transfer of credit risk is not applicable.</p> <p>However, in order to supplement the achievement of target in Priority Sector Lending (PSL) and gain good yield, the Bank has invested in Pass Through Certificates (PTC) i.e. Assets securitized by various NBFC/MFI/HFCs.</p>									
	<p>Not applicable as the Bank has not securitized-out any standard loans.</p> <p>In case of investment in PTCs, the repayment is done out of the collections from the ultimate borrowers. Further Credit Enhancement is also available as determined by Rating Agency based on the rating of the pool. If the losses in the pool exceed level of credit enhancement, then the losses are to be borne by Bank.</p>									
	<p>Bank has played the role of Investor in the securitization transactions. Bank has not provided Credit Enhancement or Liquidity Facility for Securitization during FY 2025-26. The exposures in above category as on March 31, 2026 is as under:</p> <p style="text-align: right;">(Amount in Rs. crores)</p> <table border="1"> <thead> <tr> <th>Sr. No</th> <th>Role played</th> <th>No. of transactions</th> <th>Amount involved</th> </tr> </thead> <tbody> <tr> <td>1</td> <td>Investor (O/s)</td> <td>29</td> <td>5000.61</td> </tr> </tbody> </table>			Sr. No	Role played	No. of transactions	Amount involved	1	Investor (O/s)	29

n)	Aggregate amount of: <ul style="list-style-type: none"> The capital requirements for the securitization exposures, subject to the securitization framework broken down into different risk weight bands. 	NA. Since these investments are classified under HTM, they do not fall under Trading Book but under Banking Book.
	<ul style="list-style-type: none"> Securitization exposures that are deducted entirely from Tier 1 capital, credit enhancing Interest only strips deducted from total capital, and other exposures deducted from total capital. 	NA. Since these investments are classified under HTM, they do not fall under Trading Book but under Banking Book.

Table DF-7: Market Risk in Trading Book

Market Risk is the risk of loss in the value of an investment due to adverse movements in the level of the market variables such as interest rates, equity prices, exchange rates and commodity prices, as well as volatilities therein. The Bank is exposed to market risk through its trading activities, which are carried out on its own account as well as those undertaken on behalf of its customers. The Bank monitors and manages the financial exposures arising out of these activities as an integral part of its overall risk management system. The system takes cognizance of the unpredictable nature of the financial markets and strives to minimize any adverse impact on the shareholders' wealth.

The Bank has formulated an Asset Liabilities Management (ALM) Policy, a Market Risk and Derivative Policy and an Investment Policy all of which are approved by the Board. These policies ensure that operations in securities, foreign exchange and derivatives are conducted in accordance with sound & acceptable business practices and are as per the extant regulatory guidelines. These policies contain the limit structure that governs transactions in financial instruments. These policies are reviewed periodically to incorporate changed business requirements, economic environment and changes in regulations in addition to process and product innovations.

The Asset Liability Management Committee (ALCO) comprising top executives of the Bank meet regularly to manage balance sheet risks in a coordinated manner. ALCO focuses on the management of risks viz. liquidity, interest rate and foreign exchange risks. Interest rate sensitivity analysis is measured through impact of interest rate movements on Net Interest Income (NII) and Market value of Equity (MVE) of the Bank. The Market Risk and Derivative Policy identify the trading risks to be managed by the Bank. It also lays down the organizational structure, tools, systems, processes, etc., necessary for appropriate levels of risk management in the trading book. The important risk management tools employed by the Bank are Marked to Market (MTM) of trading portfolio, PV01, modified duration, Stop loss, Greek limits, Potential Future Exposure, stress testing etc.

The Investment policy has been framed keeping in view market dynamics and various circulars issued by RBI in this regard. The policy lays down the parameters for investments in instruments, the purpose for such investments and the eligible customers with whom Bank can transact.

The Bank manages its market risk with the broad objectives of:

1. Identifying risks pertaining to trading book assets, interest rates and currencies
2. Formulating and implementing risk management policies

3. Assessing risk appetite and setting appropriate limits in consultation with business
4. Establishing monitoring and control mechanisms
5. Reducing operating costs through risk containment
6. Reviewing risk levels
7. Assessing risk adjusted performance

The Bank has an independent Market Risk Group (MRG)/Middle Office which is responsible for identification, assessment, monitoring and reporting of market risk in Treasury operations and to highlight exceptions, if any. The group also recommends changes in policies and methodologies for measuring market risk. The main strategies and processes of the group are:-

1. Delegation: Appropriate delegation of powers has been put in place for treasury operations. Investment decisions are vested with Investment Committee of the Board. MRG monitors various limits, which have been laid down in the policies.
2. Controls: The systems have adequate data integrity controls. The controls are used for audit purpose as well.
3. Exception handling processes: The limits set in the policies have been inserted in the system for ensuring that the same is being enforced to minimize exceptions. The limit breaches/exceptions, if any, are analyzed and ratified from the delegated authorities.

The MRG periodically reports on forex, investment and derivative product related risk measures to the senior management and committees of the Board. The Bank also reports to regulators as per the reporting requirements. Based on the risk appetite of the Bank, limits are placed on the risk metrics which are monitored on a periodic basis.

Aggregation of capital charge for market risks as on March 31, 2026

(Amt. in ₹ Crore)

	Risk Category	Capital charge
	Total	534.63
i)	Interest Rate Risk	308.72
ii)	Equity Position Risk	186.31
iii)	Foreign Exchange Risk	39.60
iv)	On derivatives (FX Options)	0.00

Table DF-8: Operational Risk

Operational Risk is defined as the risk of loss resulting from inadequate or failed internal processes, people & systems or from external events inherent in Bank's business activities. This includes legal risk, but excludes strategic and reputational risks. Therefore, in line with the Basel, the Bank also adopts the same definition for the purpose of management of Operational Risk within the Bank.

Operational Risk Management Framework

1. The Bank has a well-defined Operational Risk Management Policy in place. The main objectives of the policy are identification and assessment of operational risks attached to banking activities and developing capabilities, tools, systems and processes to monitor and mitigate these risks.
2. The Bank has a robust Operational Risk Management Framework and has also established an enabling organizational structure comprising Board of Directors, Risk Management Committee (RMC) of the Board and Operational Risk Management Committee (ORMC) for effective management of Operational Risk. Operational Risk Management Framework (ORMF) is also externally validated by Deloitte. Review reports on Operational Risk management activities are presented to ORMC and RMC periodically.
3. The Bank has built into its operational process segregation of duties, clear reporting structures, well defined process, clearly defined approval authority structure, operating manuals, staff training, and strong audit trails to control and mitigate operational risk.
4. The Bank currently follows the Basic Indicator Approach for computation of capital charge for Operational Risk. RBI in April 2024 had issued the master direction on Minimum Capital requirements for Operational Risk. As per the Master direction, the existing approach i.e. Basic Indicator Approach (BIA) for measuring minimum operational risk capital requirements shall be replaced by the New Standardized Approach (NSA). The effective date for implementation of NSA would be notified by the RBI.
5. The Bank is putting concerted efforts to further improve its Operational Risk management systems & procedures. The Bank has framed and implemented Key Risk Indicator and Risk & Control Self-Assessment frameworks for identification & assessment of Operational Risks. Further, the Bank has procured Comprehensive Operational Risk Evaluator (CORE) System for capturing and evaluating Operational Risk through Key Risk indicators (KRI) and Risk Control-Self Assessment (RCSA).

Key Risk Indicators (KRI) signifies risks, which are key/ critical to business process and provides early warning signals for potential operational risk loss

incidents. As these indicators are quantifiable, they are measured/monitored on a monthly/quarterly basis to identify the braches and trends.

Risk Control & Self-assessment (RCSA) approach includes identification of risks associated with various processes and corresponding controls in place for each process and thereafter, self-assessment of these risks along with the effectiveness of controls by the risk owners.

6. The Bank has also been collecting operational risk loss data from across the Bank and categorizing into various loss event types in accordance with the Basel guidelines. In addition, ORM section also performs root cause analysis for major loss events (Rs. 1 lakh & above) and presents it the ORMC. ORM Section also conducts Stress Testing and Scenario Analysis exercise periodically on Operational Risk Losses and various other plausible risk drivers to study its impact on capital and income.
7. Training programs on Operational Risk Management are periodically conducted for continued sensitization of field functionaries as well as officers working at various levels to strengthen the first line of defense.
8. The Third Party Risk Management (TPRM) Policy provides a comprehensive governance framework for identifying, assessing, and monitoring risks associated with third-party vendors. Complementing this, the Risk Assessment Tool has been designed to evaluate vendors through a structured mechanism, scoring methodology, and data inputs, generating outputs in the form of risk ratings. This tool will enable transparent and consistent evaluation of vendors, fully aligned with the TPRM framework and the Outsourcing Guidelines of both RBI and IDBI Bank. The Bank has also got the framework and risk rating model vetted from reputed external consultant..

Bank's initiatives for implementation of Business Continuity Management (BCM)

1. To safeguard the precious human life and to ensure continuity of critical Banking operations in the unlikely event of business disruption for rendering vital banking services to the customers, the Bank has a robust and resilient Business Continuity Management System (BCMS) in place which is guided by Business Continuity Management (BCM) Policy approved by the Board. Moreover the bank's Business continuity management system has also been accredited with ISO 22301 certification for compliance with the standards of ISO 22301.
2. BCM comprises Business Continuity Plan (BCP) and Disaster Management Plan (DMP). The BCM documents, for various Core, Support and Centralized functions inter alia, incorporate the modalities, in an event of business disruption/disaster and consequent recovery strategies & plans. The resilience of these plans under different disruption scenarios are tested on an on-going basis through BCP testing exercises, mock evacuation drills and Holistic DR Drill for critical IT applications. To mitigate the risk of system failure, the Bank has set

up a Disaster Recovery (DR) site at Chennai & a near DR site at Mumbai. The Bank periodically carries out DR drill exercises to test the capabilities of DR site. Reporting of any disruption incidence & BCM activities is reported through the application *i*-DaB.

3. The Bank has also developed a mobile based application called *ion* BCP to facilitate invocation of BCP by retail branches in case of disruption to carry out critical activities from the alternate branch. *ion* BCP facilitates secure transmission of vouchers images to alternate branch for faster processing and is especially helpful for isolated branches.

Table DF-9: Interest Rate Risk in the Banking Book (IRRBB)

IRRBB refers to the potential impact on the Bank's earnings and economic value of assets and liabilities due to adverse movements in interest rates. In addition to general changes in interest rate levels, variations in the magnitude of interest rate changes across different products and instruments (e.g., yield on Government securities, interest rate on term deposits, lending rate on advances etc.) is also a significant source of interest rate risk. Changes in interest rates affect the Bank's earnings through variation in its Net Interest Income (Interest Income minus Interest Expenses) as well as the economic value of equity through net variation in economic value of assets and liabilities. The extent of change in earnings and economic value of equity primarily depends on the nature and magnitude of maturity and re-pricing mismatches between the Bank's assets and liabilities.

Recognizing the importance of interest rate risk management, the Bank has put in place a robust ALM framework which incorporates the Board approved interest rate risk management policy, procedures and limit structure in line with the RBI guidelines. The objectives of interest rate risk management are to identify the sources of risk and to measure their magnitude using appropriate methods. It also includes developing appropriate strategies for funding, lending and off-balance sheet management based on factors like maturity structure, pricing, product and customer group mix within the overall framework. The Bank's tolerance level for IRRBB is specified in terms of potential impact on Net Interest Income and economic value of equity. The Asset Liability Committee (ALCO) of the Bank is responsible for ensuring regular measurement, monitoring and control activities with respect to interest rate risk management. Risk Management Department regularly measures and monitors ALM mismatches and reports to ALCO for deciding on strategies for effective management. Adequate information system has also been put in place for system based ALM reports generation on a daily basis.

Measurement and monitoring of IRRBB are carried out through the methods of Interest Rate Sensitivity (re-pricing) gap analysis and Duration gap analysis covering both

earnings (impact on net interest income) and economic value perspective (impact on economic value of equity). Preparation of interest rate sensitivity gap report involves bucketing of all interest rate sensitive assets and liabilities into different time buckets based on their respective remaining term to maturity or next re-pricing date, whichever is earlier. Bucketing of current and saving bank deposits, renewal pattern of Term Deposits etc., based on Behavioral Analysis is carried out annually. Further, core portion of current and saving bank deposits is bucketed in “over 1 year to 3 years” in accordance with RBI guidelines. Duration gap analysis is undertaken based on computation of modified duration and present value of future cash flows of the interest rate sensitive assets and liabilities.

ALCO regularly monitors the interest rate risk exposures and suggests appropriate steps/ provides directions on composition, growth of deposits and advances, pricing of deposits and advances, management of money market operations and investment books etc., to control IRRBB within the prescribed internal limits.

Impact of parallel shift in Interest Rate by 100 basis points (Time Horizon: 1 year)		
	Scenario	Impact (Rs Crores) Mar 26
Earnings at Risk (EAR)	Increase by 100 bps	1466.03
	Decrease by 100 bps	(1466.03)
Economic Value of Equity (EVE)	Increase by 100 bps	(873.35)
	Decrease by 100 bps	873.35

Table DF-10: General Disclosure for Exposures Related to Counterparty Credit Risk:

The Bank follows a structured process to ascertain the credit risk of an asset relationship with a counter-party covering both fund based and non-fund based facilities. Suitable policy frameworks are put in place in the form of Credit policy, Counterparty-Bank Policy, Market Risk & Derivative Policy, Investment Policy, Collateral Management Policy and Country Risk Policy which outline the guiding principles to manage Counterparty Credit Risk (CCR). In line with regulatory guidelines, the Credit policy of the Bank stipulates broad contours of counterparty credit exposure limits in respect of single borrower and borrowings by a group in relation to the Bank's capital fund. In addition, various internal thresholds are stipulated prudentially in relation to Net Worth, Total Committed Exposures (TCE), Total Outstanding exposure, Advances etc. Prudential limits in the form of sectorial limits are also stipulated in addition to applicable regulatory norms on the capital market segment. Currently, the Bank is computing capital on CCR following the standardized approach and adhering to regulations under Basel III.

The Bank’s rating module, encompassing various rating models, supports internal credit rating of counter-party. Product specific guidelines are also defined in terms of customer suitability and appropriateness along with applicable terms and conditions. The Bank also has a Credit Support Annex (CSA) arrangement with select counter-party banks. CSA defines the terms under which collateral is transferred between derivative counterparties to mitigate the credit risk arising from derivative positions. The process of Collateral Management covers the entire gamut of activities right from its acceptability to its legal enforceability at the time of need. In establishing credit reserve, the Bank caters to various alternative techniques including escrow mechanism and charges thereon, activating Debt Service Reserve Account (DSRA), lien mark on deposits with the Bank, stipulating conditions towards higher margin, obtaining personal and third party guarantee etc. Credit filtering standards and product guidelines of the Bank capture the associated wrong way risk exposure. The notional value of derivatives and the distribution of current credit exposure by types of credit exposure is given below:

As on Mar. 31,2026
(Amt. in ₹ Crore)

Derivatives	Notional	Current Exposure
Interest Rate Swaps	9,381.28	62.53

Extract of Basel III common disclosure template (with added column) – Table DF-11 (Part I / Part II whichever, applicable)			
Common Equity Tier 1 capital: instruments and reserves			
		Component of Regulatory capital reported by bank	Source based on reference numbers/letters of the balance sheet under the regulatory scope of consolidation from step 2
1	Directly issued qualifying common share (and equivalent for non-joint stock companies) capital plus related stock surplus	10,752.40	A1

2	Debit balance in Profit & Loss account	0.00	
3	Accumulated other comprehensive income (and other reserves)	51,758.47	B2+B3+B4+B5+B6+E2
4	Share application money received from GOI allowed as CET1 capital, pending allotment	0.00	
5	Directly issued capital subject to phase out from CET1 (only applicable to non- joint stock companies)	-	
6	Common share capital issued by subsidiaries and held by third parties (amount allowed in group CET1)	-	
7	Common Equity Tier 1 capital before regulatory adjustments	62,510.87	B1
8	Prudential valuation adjustments	-	
9	Goodwill (net of related tax liability)	-	

Table DF- 13: Main features of regulatory capital instruments

There are no regulatory capital instruments issued by the Bank as on March 31, 2026.

Table DF-14: Terms and Conditions of Regulatory Capital Instruments issued by the Bank

Not Applicable.

Table DF-16: Equities – Banking Book Positions

DF-16: Equities - Disclosure for Banking Book Positions as on March 31 2026	
	Qualitative Disclosure
1	<p>Differentiation between holdings on which capital gains are expected and those taken under other objectives including for relationship and strategic reasons</p> <p>Equity investments in the following are held in the Banking book</p> <p>1 -Subsidiaries & JVs - These are intended to be held for a long time with an intention to participate in the distribution of profits of the companies. These investments are classified under new classification as SJA w.e.f April 1, 2024 as per RBI guidelines dated September 12, 2023</p> <p>2. Associates - Most of these investments were originated by the erstwhile Development Financial Institutional (DFI) in fulfilment of its development banking role. Bank intends to divest these investments as and when opportunity arises. These investments are classified under new classification as SJA</p> <p>3. Shareholding of less than 20% in equity capital of the investee companies which has been acquired through subscription / purchase / conversion of loan dues into equity/recovery of recompose. These are intended to be held over medium term and to be divested through buyback and / or sale through third parties, stock exchanges or otherwise. These investments are classified as AFS/FNHFT/FHFT w.e.f April 1, 2024 as</p>

		<p>per RBI guidelines dated September 12, 2023.</p>
<p>2</p>	<p>Discussion of important policies covering the valuation and accounting of equity holdings in the banking book. This includes the accounting techniques and valuation methodologies used ,including key assumptions and practises affecting valuation as well as significant changes in these practises</p>	<p>As per the RBI revised guidelines w.e.f April1, 2024 as per RBI guidelines dated September 12, 2023, Equity investments classified under SJA category need not be marked to market and carried at acquisition cost. Any diminution, other than temporary, in the value of equity SJA investments is provided for. Any loss on sale of investments in SJA category is recognized in the profit and loss statement. Any profit on sale of investments under SJA category is recognized in the profit and loss statement and is then appropriated to capital reserve, net of taxes and statutory reserve. The valuation gains and losses across all performing investments, irrespective of classification (i.e., Government securities, Other approved securities, Bonds and Debentures, etc.), held under AFS shall be aggregated. The net appreciation or depreciation shall be directly credited or debited to a reserve named</p>

		<p>AFS Reserve without routing through the Profit & Loss Account.</p> <p>In the case of equity instruments designated under AFS at the time of initial recognition, any gain or loss on sale of such investments shall not be transferred from AFS-Reserve to the Profit and Loss Account. Instead, such gain or loss shall be transferred from AFS-Reserve to the Capital Reserve.</p> <p>As per the Investment policy, the quoted equity shares in the Bank's portfolio are marked to market on a daily basis. Equity shares for which current quotations are not available or where the shares are not quoted on the stock exchanges, are valued at the break-up value (without considering 'revaluation reserves', if any) which is ascertained from the company's latest balance sheet (not more than 18 months prior to the date of valuation). In case the latest balance sheet is not available for more than 18 months the shares are valued at Re.1 per company. There has been no change in these practices during the reporting period.</p>
	<p>Quantitative Disclosure</p>	
<p>1</p>	<p>Value disclosed in the balance sheet of investments as well as the fair value of those investments; for quoted securities, a comparison to publicly quoted share values where the share price is materially different from fair value.</p>	<p>Value disclosed in the balance sheet of investments Rs.4107.53crore</p> <p>Fair value of the investments Rs.5374.85crore</p> <p>A Bank considers the publicly quoted share value to be the fair value of such shares, there is no material</p>

		difference between the two values
2	The types and nature of investments including the amount that can be classified as · Publicly traded and · Privately held	Type and nature of investments - Equity shares Publicly traded (Listed) Rs.2616.45Crore Privately held (Unlisted) Rs.1543.50 Crore
